

## Portable P3000 and P6500

The **Portable range**, like all **GESAN** mobile generators, offers products that are designed for **easy transport and use**.

Their high performance, **robust design** and simple maintenance make this range ideal for small businesses, construction, livestock farming, agriculture, etc.

These products have been designed at **GESAN's** European innovation center to guarantee the highest quality standards.

 **Performance**

 **Easy to use**

 **Robustness**

 **Safety**

**Robust and compact design** to withstand the most adverse conditions.

**High capacity reinforced tank** for greater autonomy and protection.

**Sensitive areas are protected** against the most adverse conditions.

**AVR regulation**

**Electrical panel with:**

- On/off switch
- Hour-metre
- Start-up and alarm indicator lights
- Power outlets
- Electric start (P6500/W/T).

**AVR regulation**

**Easy operation and transport.**

The design makes it easy to transport to any location. The **P3000 model** can be moved easily thanks to the side bars. In addition, **model P6500** can be moved without any extra effort with the handles and wheels kit which is included.

# CE

**Marking which includes the following directives:**

- |             |   |
|-------------|---|
| 2006/42/EC  | Machine safety  |
| 2006/95/EC  | Low voltage   |
| 2004/108/EC | Electromagnetic compatibility                                     |
| 2000/14/EC  | Noise emissions of outdoor equipment in soundproof generator sets |
| 97/68/EC    | Gases and contaminating particles emissions.                      |
